

I have only been listening to XM radio for about 6 months but I have never enjoyed radio like this before. XM has played by the rules and should not have jealous competitors try to stop them because they are too lazy to step up to the plate and compete in a FREE society. Progress is progress and some folks never learn that it happens and they need to step it up a notch rather than just squashing competition thru legislation. Please reject NAB's petition 04-160 as it should be. I am free to listen to what I want and I have been given a better product that I am happy to pay for. If the others don't like it, let them come up with a better product....not just try to shoot down someone else because they don't want to compete....that's what has made this country great.....competition builds a better America.Thank you for listening.
Richard Smith
